Installation Notes

Installation

Snap the mounting carrier onto the DIN-rail.

Use the cover as an end plate.

Remove the mounting carrier from the DIN-rail.

Application

A mounting carrier (see accessories) suits applications where the connectors must be marked and secured in position. The DIN-35 rail-mount carrier fits up to two connectors and can also be mounted on a flat surface using two screws.

Using this connector carrier, a large range of wiring applications can be achieved in distribution or junction boxes. To mention just a few: potential multiplication and changing from or to 6 mm² (10 AWG) conductor size.

Subject to changes. Please also observe the further product documentation!
